

# How do you add a digital signature using Adobe PDF

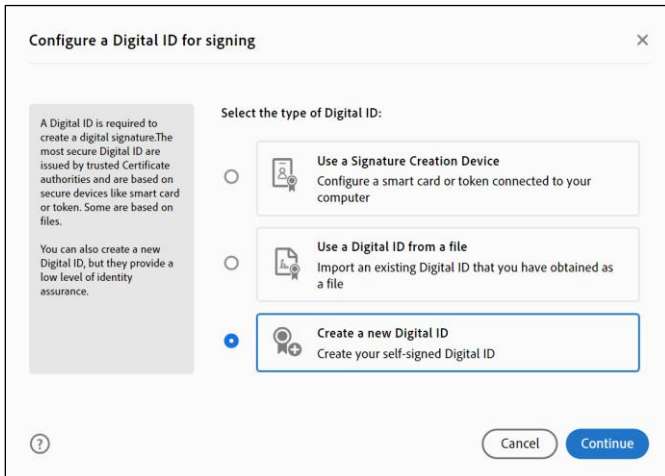

Open the Sunrise pdf form with Adobe Reader. Click on the signature line where you are supposed to sign on.

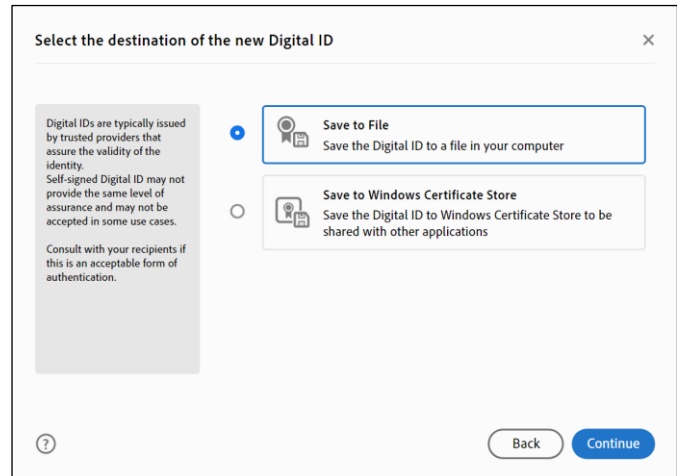

If this is your first time, select Configure Digital ID.

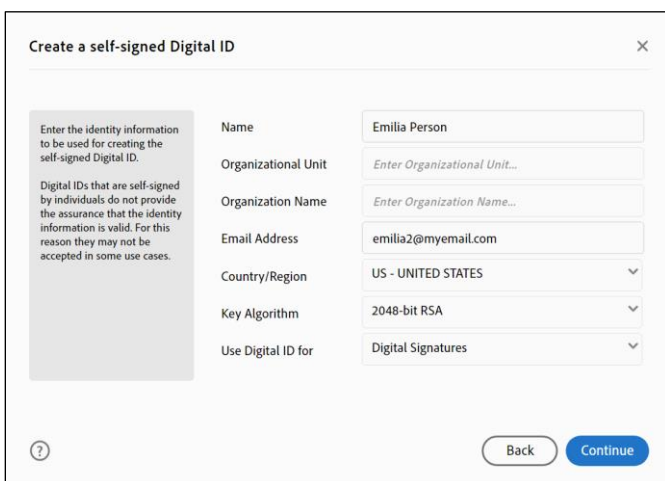

Click on 'Create a new Digital ID' and select Continue.

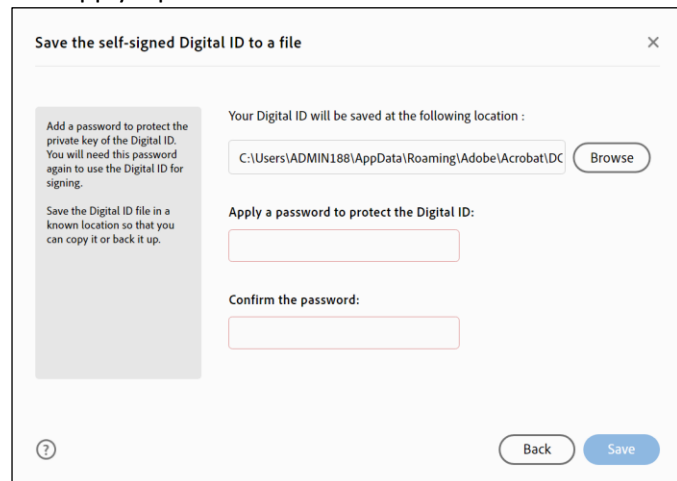

Next, select Save to File and Continue.

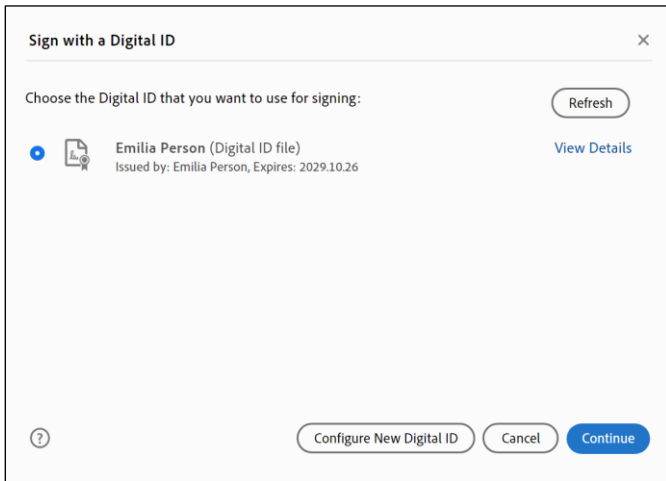

Fill in Name and Email. Click Continue.

Change location of digital file if needed. Apply a password and click Save.

Choose the Digital ID you want to apply and select Continue.

Enter your password you created and click on Sign.

The signature will be applied to your pdf file. Select location to save your signed form. This is what an example of a digital signature will look like when completed.

Emilia Person Digitally signed by Emilia Person  
Date: 2024.10.26 12:19:07 -04'00'

Signature of Parent

Optional Step: To validate the digital signature, click on the signature properties, this is what you should see.
